# OVERVIEW

---

The Cessna 182 Skylane is ubiquitous, and for good reason. Easy to fly, great economics, and an all-around strong performer, the 182 provides the quality general aviation experience that makes Cessna so beloved. In production since 1956, you can find the Cessna 182 at almost every airport in the United States, including some with retractable gear or floats. In all, Cessna has produced over 23,000 182s on a production line that still runs today.

The T-variant of the 182 builds on the legendary success of the model line, bringing the aircraft into the modern era. Although it retains the classic 182 four seat configuration, the engine was upgraded to the Lycoming IO-540-AB1A5 engine and features an increased max gross weight of 3,100 lbs.

The 182 is beloved with good reason; the 182T gives pilots and owners the 182 experience in a modern package.
