OVERVIEW

The Cessna Citation is a globally recognized business jet. With straightforward engineering and avionics, the Citation is popular with owners, pilots, and maintainers for its ease of operation.

The Model 550 Citation II is the next iteration of the Citation light business jet and combines all of the great features of the Citation I with an extended airframe. It features a range of 1,220nm and a cruise speed of 355kts.

With seating for 7, an aft lavatory, and folding tables, your passengers will enjoy their trip. The aircraft can fit 77 cubic feet of baggage, almost evenly split between exterior and interior storage.

When you're ready to move up to a light business jet, the Cessna Citation II is an excellent choice.
