OVERVIEW

The Beechcraft King Air is an iconic aircraft design, going all the way back to its first production model in 1969. The King Air 300LW is an upgraded version of the long-running and popular B200 series, an all-around star performer.

Featuring Pratt & Whitney PT6A-60A engines, the King Air 300LW has all of the upgrades of the King Air 300, but with strategic weight reductions. As a result, it features the same gross weight as the B200 model, but the upgraded -60A engines and 300 kts cruise speed of the 300 series.

With seating for 9, passengers can relax and enjoy the flight in a roomy cabin. In addition, the 300LW features a large aft cargo area to transport luggage securely.

The King Air series is beloved for its success as a corporate and family transport aircraft and robust feature set.
